

Christophe SEGUINOT

SENIOR FRONTEND DEVELOPER

Profile

I am a React expert with extensive experience developing high-quality applications using modern web technologies and frameworks.

I am a strong advocate for best practices and clean code. I always strive to maintain a balance between code quality and project timelines while adapting my coding standards to the expectations of the teams I work with.

Employment History

React Frontend Developer, Freelance, Full Remote

SEPTEMBER 2019 — PRESENT

Since the end of 2019, I have been freelancing for various clients across multiple industries so I have experience integrating into existing development teams to assist with feature development.

- I develop applications using **React**, **TypeScript** and **Redux**, as well as **React-Query**, to create dynamic and scalable user interfaces.
- I conduct rigorous unit testing using **React-Testing**, **Jest**, and **Cypress** to ensure the quality and functionality of the applications.
- As a proponent of pixel-perfect design, I develop graphical interfaces from Figma mockups with meticulous attention to detail. I'm a very enthusiast about **TailwindCSS** and **Styled-Component**
- I contribute to team collaboration and code quality by conducting thorough code reviews and pull requests on GitHub.

React Frontend Developer, Freelance for Rounded, Full remote

JANUARY 2023 — MARCH 2023

Bug fixing and development of new features on a cryptocurrency accounting SaaS solution targeted for the American market:

- Next.js, Typescript, Tailwind, Style-Component, Rest API

React Frontend Developer, Freelance for Blueplan, Full Remote

SEPTEMBER 2022 — DECEMBER 2023

Based on Figma mockup I developed from scratch a web game "[The Smurfs](#)" using Next.js and Web3, where the objective is to earn access to pre-sales of "The Smurfs" NFTs:

- Next.js, React.js, Typescript, Style-Components, Tailwind, Rest API, Web3

React Frontend Developer, Freelance for Syment, Full Remote

Reading

React Frontend Developer, Freelance for Moona, Full Remote

AUGUST 2020 – DECEMBER 2020

Development from scratch of the front-end part of two web applications of [Moona](#) dedicated to online payment:

- React, Redux, Saga, Styled Components, Typescript, AWS Serverless, GraphQL, and Stripe.

React Frontend Developer, Lalilo, Full Remote

APRIL 2020 – MAY 2020

After partnering with the French Ministry of Education through the Innovation Partnership for Artificial Intelligence (P2IA), Lalilo tasked me with developing from scratch the p2ia.lalilo.com website to showcase this collaboration:

- React.js, TypeScript, styled-components, and JavaScript.

React Frontend Developer, RenovationMan, Full Remote

OCTOBER 2019 – FEBRUARY 2020

Develop from scratch <https://www.renovationman.com> website on the JAMStack principles using Gatsby as a static site generator and DatoCMS as an online Headless CMS.

- React.js, GatsbyJS, GraphQL, DatoCMS.

Frontend Developer, Websenso, Charges

DECEMBER 2017 – SEPTEMBER 2019

My mission was to develop React applications within a web agency using Drupal 8 Headless as the backend:

- React, Bootstrap, Drupal, GraphQL

Plumber, Contractor and Business Owner, Grenoble and Charges

SEPTEMBER 2012 – SEPTEMBER 2017

I completed my plumbing vocational training (CAP) in one year in Chambéry, and then worked as a plumbing and heating technician for 5 years, including as a temporary worker, on fixed-term contracts, and as a self-employed artisan.

Java Backend Developer, Mainly Bull and Capgemini, Paris and Marseille

SEPTEMBER 2003 – SEPTEMBER 2012

I mainly contributed to the integration of large Java/J2EE software packages for Capgemini and the development of Java/J2EE applications from scratch for Bull

- EJB3, JPA (Hibernate), Java Web Start, JBoss, Weblogic, Oracle

Education

Ecole Centrale de Marseille

SEPTEMBER 2020 – SEPTEMBER 2023

Graduated with honors
