HOBBIES

Trail, hiking, learning, reading and meditation

PROFILE

Experienced professional with over 15 years' experience in the Web. Expertise in React, TypeScript, Next and Redux. Experienced in development and maintenance of SaaS solutions, from development to production via CI/CD. Enthusiastic about teamwork and producing robust, tested, quality code. Adept at pixel-perfect and ergonomic interfaces. Good communicator, empathetic and able to take the lead.

EMPLOYMENT HISTORY

Front end Developer React | Next | Typescript | Redux at Freelance
September 2019 — Present

- development of web application using React, Next, TypeScript, Redux and Rest or Graphql APIs, with a focus on pixel perfect, performance, UX and code quality
- development of unit, functional and end-to-end tests using jest, react-testing and cypress libraries
- close collaboration with the Product Owner, designer and backend team to solve problems and to design solutions
- sharing my SAAS experience on the frontend
- participation in code reviews
- lead junior developers

Lead front end Developer React | Next at Clickn Collect
May 2023 — December 2023

- Context: Ecommerce and SAAS, development from scratch
- Project: An e-commerce showcase and SaaS platform for creating digital catalogs
- Team: One product owner and one backend developer
- Main achievements: Front-end development lead for both solutions, from creation to online launch. Integration of a Figma model and graphql endpoints provided by the Vendure backend. Participation in product definition, solution roadmap and share of my experience in Web and SaaS development. Integration of payments via Stripe. Development of a mobile-first, high-performance solution, optimized for SEO and accessibility.
- Stack: Next 14, Typescript, Graphql, Redux, Tailwind, HeadlessUI, Jest, React-testing, Cypress

Lead front end Developer React | Next at Rounded
January 2023 — March 2023

- Context: Crypto and SaaS accounting
- Project: Development of an accounting solution for the US and cryptocurrencies
- Team: One Product Owner, one Python backend developer and one junior react developer.
- Main achievements: Audit of existing codebase and suggestions for improvements. Integration of the Python Rest API. Implementation of new functionalities and maintenance
- Stack: Next.js, React.js, TypeScript, Redux, Material UI, Tailwind, Styled Components, Cypress

Lead front end Developer React | Next at Blueplan

September 2022 — December 2022

- Context: Web3, NFT and web games
- Project: Development of a web game to promote NFT "The Smurfs".
- Team: A CTO in San Fransisco and a Web3 developer in Bali
- Main achievements: Understanding the challenges of Web3 and the architecture of a React/Web3 application. Pixel-perfect integration of a Figma model with an artistic design. From scratch development of the game in mock mode to enable the web3 developer to easily integrate the backend logic. Collaboration in an international context
- Stack: Next.js, React.js, TypeScript, Styled Components, Tailwind, Rest API, Web3, Git, CI/CD, Mobile first
